

Note: Please replace your index with this updated version. This is the final index for the 1992 notebook

Topic	Title	Section	Page
<b>A</b>			
Accuracy	Large Format Output Devices	Miscellaneous	1
Acronyms	Acronyms	Miscellaneous	1-4
Common link acronyms	PostScript to High-End Links	Miscellaneous	4
Additive color primaries (RGB)	Color in Printing	Color	2
	Color Spaces and PostScript Level 2	Color	1-2
Addressability	Addressability and Spot Size	Miscellaneous	1-2
	Hard Dot, Soft Dot	Halftoning	2
	Line Art	Scanning	2
	Resolution and Screen Ruling	Halftoning	2
Adobe Type Manager (ATM)	PostScript Font Basics	Fonts	2-3
	Understanding PostScript Fonts	Fonts	1
AFM file (see Font metrics)			
Analog and digital	The Scanning Process	Scanning	1-2
Application Specific Integrated Circuit (ASIC)	Color Management	Color	4
Argon ion laser (see Lasers)			
Association Typographique Internationale (ATypI)	Fonts and Font Licenses	Fonts	2
Automatic calibration	Automatic Calibration	Calibration	1-2
Automatic image analysis	Color Management	Color	4
Automatic Page Positioning (APP)	Large Format Output Devices	Miscellaneous	3-4
<b>B</b>			
Bézier curve	PostScript Font Basics	Fonts	2
Bit	Scanned File Size	Scanning	1-2
Bitmapped (see Raster images)			
Bitmapped font (see Font)			
Blend	Blends and Shadestepping	Halftoning	1-4
	Blend Update	Halftoning	1-4
Blends versus scans	Blend Update	Halftoning	1
Duplication, sampled data, and synthetic data blends	Blend Update	Halftoning	1
Maximum length of blend chart	Blends and Shadestepping	Halftoning	4
Mysterious blend problems	Blend Update	Halftoning	3
Byte	Scanned File Size	Scanning	1-2
<b>C</b>			
Cache (see Font cache and Screen cache)			
Calibration	Calibration	Calibration	1-4
	Color Spaces and PostScript Level 2	Color	4
	Density and Dot Percent	Calibration	4
Automatic calibration	Automatic Calibration	Calibration	1-2
On imagesetter paper	Calibrating on Imagesetter Paper	Calibration	1-4
Scanner	The Scanning Process	Scanning	2
Through color rendering dictionaries	The Scanning Process	Scanning	4
Capstan	Large Format Output Devices	Miscellaneous	1-3

Topic	Title	Section	Page
Cause & effect diagram	Basic Statistical Process Control	Miscellaneous	1-2,3
CCMac	PostScript to High-End Links	Miscellaneous	2,3,4,6
Centigrade to fahrenheit conversion	Converting Measurements	Miscellaneous	2
Charts			
Additive color primaries and their mixtures	Color in Printing	Color	2
Addressability and overlap of spot size	Addressability and Spot Size	Miscellaneous	2
Blend file size chart	Blend Update	Halftoning	2
Check sheet for imagesetter film defects	Basic Statistical Process Control	Miscellaneous	3
Communications ports	Troubleshooting PostScript Errors	Miscellaneous	3
Common link acronyms	PostScript to High-End Links	Miscellaneous	4
Density setting versus dmax	Calibration	Calibration	3
Dmax value versus light transmitted	Graphic Arts Film Materials	Film & Processing	3
Dot % on imagesetter paper	Calibrating on Imagesetter Paper	Calibration	3
File storage methods	PostScript to High-End Links	Miscellaneous	4
Film quality checklist	Analyzing Film Output	Film & Processing	1
Functions performed by a color computer	The Scanning Process	Scanning	1
Hazardous materials identification system	Film Processor Chemicals	Film & Processing	1
Image file size	Scanned File Size	Scanning	4-5
Imagesetter/RIP background information	Troubleshooting PostScript Errors	Miscellaneous	1
Job Complexity	Outputting PostScript Jobs	Miscellaneous	4
Maximum length of blend chart	Blends and Shadestepping	Halftoning	4
Measurement conversions	Converting Measurements	Miscellaneous	1-2
Offending PostScript commands	Troubleshooting PostScript Errors	Miscellaneous	4
Output check list	Outputting PostScript Jobs	Miscellaneous	4
Rational tangent screening charts	Rational and Irrational	Halftoning	2
Recommended levels of gray	Resolution and Screen Ruling	Halftoning	3
Regulation and enforcement agencies	Film Processor Chemicals	Film & Processing	2
Requested versus measured dot percent	Calibration	Calibration	2
Resolution settings in mm., cm., and in	Calibration	Calibration	2
RIP/recorder errors	Troubleshooting PostScript Errors	Miscellaneous	2
RIP status	Troubleshooting PostScript Errors	Miscellaneous	2
Selected output device specifications	Large Format Output Devices	Miscellaneous	1
Time chart for imagesetter film dmax	Basic Statistical Process Control	Miscellaneous	4
Troubleshooting common film processor problems	Maintaining a Film Processor	Film and Processing	4
System 7 capability	System 7	Miscellaneous	3
System 7 printer drivers	System 7	Miscellaneous	4
Characteristic curve	Graphic Arts Film Materials	Film & Processing	2
Characterization	Color Spaces and PostScript Level 2	Color	4
Chemical waste disposal	Film Processor Chemicals	Film & Processing	2-3
Chokes and Spreads	Trapping	Color	1
Chroma	Color Management	Color	4
ChromaCom	PostScript to High-End Links	Miscellaneous	2,4,6
CIE L*a*b* (see Commission International de l'Eclairage)			
Clip art	Line Art	Scanning	4
Closed systems	Color Management	Color	1
CMYK (see Process colors)			
Color Assistant	Color Management	Color	4
Color			
Color computer	The Scanning Process	Scanning	1-3
Color gamut	Color Spaces and PostScript Level 2	Color	3
Color separation	Color in Printing	Color	3
Color separation in flexography	PostScript and Flexography	Miscellaneous	4
Color shifts	Moiré	Color	2
	Moiré, Rosettes, and Color Shifts	Color	2-3
Color spaces	Color Spaces and PostScript Level 2	Color	1-4
Color management	Color Management	Color	1-4
Device dependent output	Color Management	Color	1-2
Input device calibration	Color Management	Color	1
Monitor calibration	Color Management	Color	1-2
Color Path	PostScript to High-End Links	Miscellaneous	3,6
Commission International de l'Eclairage (CIE)	Color Spaces and PostScript Level 2	Color	2-3
Communications ports	Troubleshooting PostScript Errors	Miscellaneous	3
Communication errors	Troubleshooting PostScript Errors	Miscellaneous	5

Topic	Title	Section	Page
Compression .....	Scanned File Size .....	Scanning .....	4
Concert 2.0 .....	Understanding PostScript Fonts .....	Fonts .....	5
Contacting .....	Graphic Arts Film Materials .....	Film & Processing .....	4

## D

Decimal to fraction conversion.....	Converting Measurements .....	Miscellaneous .....	2
Degradé (see Blend)			
Densitometer .....	Calibration .....	Calibration .....	4
	Calibrating on Imagesetter Paper .....	Calibration .....	2
Density .....	Analyzing Film Output.....	Film & Processing .....	3
	Calibration .....	Calibration .....	1
	Calibrating on Imagesetter Paper .....	Calibration .....	2
	Density and Dot Percent.....	Calibration .....	1-4
Density setting (see Laser intensity)			
DENSITY .....	Acronyms.....	Miscellaneous .....	2
Device dependence in halftoning .....	Rational and Irrational.....	Halftoning.....	4
Device independence .....	Line Art .....	Scanning .....	2
Device independent color .....	Color Spaces and PostScript Level 2.....	Color .....	1
Device specific versus device independent .....	Outputting PostScript Jobs .....	Miscellaneous .....	1
Disk storage .....	Understanding PostScript Fonts .....	Fonts .....	2
Dmax .....	Analyzing Film Output.....	Film & Processing .....	1-4
	Calibrating on Imagesetter Paper .....	Calibration .....	2
	Graphic Arts Film Materials .....	Film & Processing .....	1-3
Dot (see Halftone dot)			
Dot percent .....	Resolution and Screen Ruling .....	Halftoning.....	1
On film.....	Analyzing Film Output.....	Film & Processing .....	3-4
	Automatic Calibration .....	Calibration .....	1-2
	Density and Dot Percent.....	Calibration .....	1-4
	Hard Dot, Soft Dot .....	Halftoning.....	2
	Graphic Arts Film Materials .....	Film & Processing .....	4
Dots per inch .....	Hard Dot, Soft Dot .....	Halftoning.....	2
Draw (see Vector images)			
Double duplo mode.....	Large Format Output Devices .....	Miscellaneous .....	3
Drum.....	Large Format Output Devices .....	Miscellaneous .....	1-3
Duping .....	Graphic Arts Film Materials .....	Film & Processing .....	4
Duplo mode .....	Large Format Output Devices .....	Miscellaneous .....	3

## E

Edge sharpness.....	Graphic Arts Film Materials .....	Film & Processing .....	3-4
Electronic technology quiz.....	Technology Quiz .....	Miscellaneous .....	1
Elliptical halftone dot shape.....	Digital Halftone Dots.....	Halftoning.....	3
	Halftone Dot Shape .....	Halftoning.....	2
Encryption of fonts.....	PostScript Font Basics .....	Fonts .....	3-4
Enlargement of scanned images.....	Scanned File Size .....	Scanning .....	3
	From Input to Output .....	Scanning .....	3
Emulsion (see Film)			
EPS files .....	Scanned File Size .....	Scanning .....	1
Extension .....	PostScript to High-End Links .....	Miscellaneous .....	1
External drum .....	Large Format Output Devices .....	Miscellaneous .....	1-2

Topic	Title	Section	Page
<b>F</b>			
Fahrenheit to centigrade conversion	Converting Measurements	Miscellaneous	2
File formats	PostScript to High-End Links	Miscellaneous	4
File size charts for line art, grayscale, and color	Scanned File Size	Scanning	5
File storage	PostScript to High-End Links	Miscellaneous	5
Fill	Trapping	Color	2
<b>Film</b>			
Base	Analyzing Film Output	Film & Processing	2
Contacting	Graphic Arts Film Materials	Film & Processing	4
Contrast	Graphic Arts Film Materials	Film & Processing	2
Dmax	Graphic Arts Film Materials	Film & Processing	3
Effect of laser on	Lasers and Films	Film & Processing	1-2
Emulsion	Analyzing Film Output	Film & Processing	2
	Maintaining a Film Processor	Film & Processing	1
Exposure	Graphic Arts Film Materials	Film & Processing	2
Film resolution	Maintaining a Film Processor	Film & Processing	1
Film storage	Maintaining a Film Processor	Film & Processing	1
Film types (lith, rapid access, and hybrid)	Graphic Arts Film Materials	Film & Processing	1
	Maintaining a Film Processor	Film & Processing	2
Latent image	Maintaining a Film Processor	Film & Processing	1
Linearity	Graphic Arts Film Materials	Film & Processing	1
On-line processing	Maintaining a Film Processor	Film & Processing	4
Output	Analyzing Film Output	Film & Processing	1-4
Oxidation	Maintaining a Film Processor	Film & Processing	3
Processor chemicals	Film Processor Chemicals	Film & Processing	1-4
Registration	Analyzing Film Output	Film & Processing	2
	Large Format Output Devices	Miscellaneous	3
Right/wrong reading	Analyzing Film Output	Film & Processing	1-2
<b>Film Processing</b>			
Cleaning a film processor	Maintaining a Film Processor	Film & Processing	3
Developer, stop bath, fixer, and wash	Maintaining a Film Processor	Film & Processing	2
Effect of agitation, time, and temperature	Maintaining a Film Processor	Film & Processing	2
Effect on halftone dot percent	Calibration	Calibration	1
	Density and Dot Percent	Calibration	2
Troubleshooting	Maintaining a Film Processor	Film & Processing	3-4
<b>Filter (see Raster Image Processor)</b>			
Final page calculations	PostScript to High-End Links	Miscellaneous	2
Flatness	Outputting PostScript Jobs	Miscellaneous	4
<b>Flexography</b>			
Color separation in	PostScript and Flexography	Miscellaneous	1-6
Dot gain in	PostScript and Flexography	Miscellaneous	4
Distortion in	PostScript and Flexography	Miscellaneous	1,2,5,6
Halftone dot shape in	PostScript and Flexography	Miscellaneous	3,6
Screen ruling in	PostScript and Flexography	Miscellaneous	3
Trapping in	PostScript and Flexography	Miscellaneous	3
<b>Font</b>			
Bitmapped font	PostScript Font Basics	Fonts	1-4
